Setting up AutoCAD Civil 3D 2020 - National NRCS

Here are steps that NRCS CADD users need to take in order to setup their Autodesk Civil 3D 2020.

If you have a workspace that you have created and would like to us in Civil 3D 2020, please follow the directions for Saving and Importing Workspace prior to having 2020 installed.

1. **IT**: Installs the CADD software from the national NRCS deployment - Autodesk Civil 3D 2020 (CRQ 3708606).

2. **User**: Verifies that the national NRCS C3D 2020 Customization files have been installed.

   - 2 options can be used for determining if it has been installed:
     -If C:\Program Data\CAD Std 2020 exists and contains 4 folders, then the Customization files have been installed
     -Using *Microsoft Endpoint Manager - Software Center* go to the Applications tab and see whether *NRCS Autodesk Civil 3D 2020 Customization 1.0* shows up. If not, check the Installation Status tab. If it appears there you may be able to force it to complete the installation.
   - If the Customization files are not there 2 days after Civil 3D 2020 is installed, then contact IT to assist with installing *NRCS Autodesk Civil 3D 2020 Customization 1.0* (CRQ 3745097).

3. **User**: Follows instructions for setup of NRCS customization (<u>User setup NRCS Civil 3D 20.pdf</u>)

   1. If an Autodesk licensing screen appears, follow these instructions. (<u>Activating Autodesk Civil 3D 2020 Network license.pdf</u>)
