THERE WILL BE NO CHANGES IN SPECIFICATION, DIMENSIONS, OR MATERIALS UNLESS APPROVED BY THE ENGINEER RESPONSIBLE FOR THIS DRAWING.

THE DRAWINGS ARE PREPARED COOPERATIVELY BY THE NATURAL RESOURCE CONSERVATION SERVICE FOR THE NAMED LANDOWNER. CONSTRUCTION FOUND NOT IN ACCORDANCE WITH THESE DRAWINGS AND SPECIFICATIONS SHALL VIOLATE THE COOPERATIVE AGREEMENT AND ALL DRAWINGS, SPECIFICATIONS, AND QUANTITIES ESTIMATE SHALL IMMEDIATELY BE RETURNED TO THE LOCAL NRCS OFFICE.

THE CONTRACTOR/OWNER IS TO NOTIFY THE SOIL CONSERVATION DISTRICT AT LEAST 72 HOURS PRIOR TO CONSTRUCTION TO SCHEDULE A PRECONSTRUCTION MEETING, FACILITATE ANY SCHEDULING, LAYOUT, OR PRELIMINARY MOBILIZATION NECESSARY TO ENSURE PROPER CONSTRUCTION INSPECTION TO ENABLE APPROPRIATE CERTIFICATION OF THE PROJECT. A CONSERVATION TECHNICIAN SHALL VERIFY CUT/GRADE STAKES AT THE CONTRACTORS REQUEST.

THE OWNER/OPERATOR GIVES PERMISSION FOR MDE AND COE INSPECTION.

IT IS THE LANDOWNER'S RESPONSIBILITY TO OBTAIN ALL COUNTY, STATE, AND FEDERAL PERMITS THAT MAY BE NEEDED, AND TO MAINTAIN THIS STRUCTURE AND RELATED REGULATIONS.

ALL EXCAVATION AND METHODS OF CONSTRUCTION SHALL BE IN ACCORDANCE WITH THE MARYLAND OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION (MOSHA) STANDARDS AS SET FORTH IN THE LATEST VERSION OF THE CODE OF MARYLAND REGULATIONS.

**Call** before you dig.

"The Soil Conservation District makes no representation as to the existence or Non-existence of any utilities at the construction site. Shown on these construction drawings are those utilities which

have been identified. It is the responsibility of the landowners or operators and contractors to assure themselves that no hazard

exists or damage will occur to utilities"

Know what's **below**.

Producers are responsible for securing grading, building, electrical, and plumbing permits to install the required facilities and for properly managing the facility.

### CRITICAL INSPECTION ITEMS - (Roofed Animal Mortality Facility)

- 2/20/21 1. The landowner will arrange for a pre-construction meeting between the contractor, NRCS and landowner to review the plans, standards and specifications prior to the start of construction.
- 2. There will be no changes in specifications, dimensions, or materials unless approved by the engineer responsible for this drawing.
- 3. The drawings are prepared cooperatively by the Natural Resources Conservation Service for named owner/operator. Construction found not in accordance with these drawings and specifications shall violate the cooperative agreement and all drawings, specifications, and Quantities Estimate shall immediately be returned to the local NRCS office. 4. The following is a list of items that must be inspected by the Technician-in-Charge. If cost share is involved, payment
- may be forfeited if the Technician-in-Charge does not inspect all of the below: Preconstruction Meeting Date Initials: • Verify layouts: Date: Initials: • Verify all subgrades: Date: Initials: • Verify all subgrade materials CR-6 etc: Date: Initials: • Verify reinforcing steel grade, size and placement: Footings: Date: Initials: Walls and/or curbs: Date: Initials: Floor Date: Initials: • Inspect all concrete in accordance with specifications: Initials: Footings: Date: Walls and/or curbs: Date: Initials: Full dimension wall ties: Date: Initials: Date: Floor Initials: Date: • Proper curing of concrete: Initials: • Patching wall ties, holes and honeycombing: Date: Initials: • Roof inspection in accordance with plans: Initials: Posts size, material and installation: Date: Preservative treatment or use code: Date: Initials: Anchors or embedment installation: Date: Initials: Header size, material and installation: Date: Initials: Date: Initials: Hardware size, spacing, and type: Knee brace (post to truss) size and material: Date: Initials: Hardware size, spacing, and type: Date: Initials: Y brace (post to header) size and material: Date: Initials: Hardware size, spacing, and type: Date: Initials: Hurricane straps: Date: Initials: Received/reviewed truss design sheet: Date: Initials: Purlins material and installation: Date: Initials: Hardware size, spacing, and type: Date: Initials: Roofing, material and installation: Date: Initials: Date: Hardware size, spacing, and type: Initials: Backfill placement and compaction Date: Initials: • All disturbed areas seeded and mulched: Date: Initials: • Other items shown on the plans: Date: Initials:

## **CONSTRUCTION NOTE**

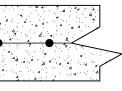

- 1. Before construction begins contact the District Office It is the landowner's responsibility to obtain all necess this structure in accordance to those regulations.
- 2. All materials and construction shall be in accordance standards and construction specifications.
- 3. All components of the completed system shall conform elevations, dimensions and materials shown on the pla
- 4. Any changes in the plans or specifications must be ap approver prior to being made. Changes are to be review concurrence.
- 5. Prevent any sediment from leaving the construction sit where appropriate.
- 6. Salvage topsoil and fill material and stockpile to use for
- 7. Clear and grub all areas necessary for the construction
- 8. Construct pad for structure. Fill material under the stru maximum 8-inch lifts (before compaction). The lifts sh traversing of the entire surface by not less than one tra minimum of four complete passes with a sheepsfoot, w
- 9. Construct Composting Facility in accordance with the elevation shall be a min. 2' above seasonal high water
- 10. Perform final grading of the site. Place fill material aro inch lifts (before compaction). Compaction shall be pe moisture content with hand tampers or other manually equipment. Backfill shall be kept approximately level a structure.
- 11. Topsoil all disturbed areas using on-site salvaged top according to specifications. Seed and mulch disturbed disturbed areas to be stabilized within 14 days of com

### TIMBER CONSTRUCTION NOTES 8/2017

1. All lumber below the fascia board level shall be preservative pressure treated Southern Yellow Pine, No.2 KD, 19% m.c. or better. All other lumber may be either Southern Yellow Pine or Spruce-Pine-Fir No. 2 or better unless specified otherwise. Protection such as clear preservative, paint, or pressure treatment shall be required for the plywood. Timber shall be pressure treated in accordance with the chart below.

Use Codes for Treated Building Materials					
Use Code for Ground or Manure Contact Lumber	UC4B				
Use Code for all other Treated Lumber	UC4A				

- 2. Glulam posts used as columns shall be CCA pressure treated to a 0.60 retention factor a minimum 12" above the ground line on the ground contact end.
- All metal hardware and nails shall be stainless steel or hot-dip galvanized (HDG). Stainless steel shall be grade types 304 or 316. Hot dipped galvanized fasteners shall conform to ASTM A 153 and hot-dip galvanized connectors shall conform to ASTM Standard A 653 (Class G-185).

All fasteners, connectors, and any other metal contacting ACZA, ACQ or CA treated wood shall be stainless steel.

There may be additional products (other than stainless steel and hot-dip galvanized) which are suitable for use in treated wood except for the types listed in the note above. These screws and connectors have proprietary anti-corrosion technologies and are acceptable for treated wood exposed to moisture when used according to the hardware manufacturer's recommendations and must be clearly marked "for use with" the **type** of treated wood being used.

- 4. All structural nail connections must be nailed with twisted or ring shank nails, unless otherwise as shown.
- 5. Power driven nails (PDN) shall be 0.131 Diameter or larger, deformed shank, and helical (spiral) or annular (ring) type. The number and length of 0.131 diameter power driven nails is specified in parenthesis next to each connection. Pressure shall be applied to wood members to insure tight joints when using power driven nails. The head of the nail may not be countersunk more then 1/16" into the wood.

Truss shown on the drawing is for illustration purposes only.   Trusses shall be designed and approved by a licensed engineer.   Truss manufacturer shall furnish all drawings for bracing required on trusses.   Scissors trusses are acceptable with a level bearing plate.	ſ
Truss Design: Spar: (Specify span to outside of post) Slope: 5 in 12 Truss Spacing: 4' 0" on center Overhang: 2'- 0" Gable end trusses shall be sheathedIIIIITruss Loadings: MINIMUM LOADINGS ARE SHOWN BELOW (COUNTY MAY REQUIRE HIGHER LOADINGS)II<
